**282** CONSULTATION DOCUMENT Delivery of housing through the planning system. The following comments were RESOLVED to be included in the City Council's response:

- Local housing authority waiting lists alone do not accurately reflect the actual demand of housing required in a specific area and by their very nature are often out of date.
- Housing requirements can be calculated more accurately for inclusion in an LDP if Local Authorities were to listen to Community Councils and hold more local engagement to gain a realistic perspective of future housing requirements.
- At present landowners would gain more financially by selling the land to a private developer as opposed to a local authority for affordable housing, which thus prohibits the delivery of affordable housing as opposed to private housing.
- Land supply should be monitored in relation to delivering the housing requirement set out in an adopted LDP by contacting the landowner on a set basis (e.g. every two years) to assess whether they are in a position to develop the land if not the LDP should be amended to reflect this.
- However, should land become available following the publication of an LDP it would seem futile to wait until a subsequent LDP was published in five years' time before allocating the land for development.
- Local Authorities should pursue a better exception site policy.
- Smaller settlements are too strictly controlled, smaller hamlets and villages need to be allowed to grow in order for the next generation to be given a chance to live there.
- Year round dwellings need to be given the same planning consideration as holiday lets e.g. dwellings in rural areas being refused planning permission because the property is not on a bus route seems grossly unjust and completely out of context within the surrounding environment.

Whilst the City Council supports the site being allocated for housing within the LDP in principle, members considered that the height, scale, density and layout of the proposed houses would have a detrimental visual and environmental impact on the surrounding area, in particular upon the character of the neighbouring properties and listed buildings. Furthermore, the Council considered that the proposal would over-develop the site and the proximity of the proposed houses would overshadow the immediate adjacent properties, creating both a lack of privacy and natural light. In addition to the aforementioned detrimental impact that the proposal would have on the neighbouring properties, the Council considers that the current sewerage infrastructure is inadequate and would be unable to meet the additional requirements resulting from the development. It was unanimously RESOLVED to refuse to support the application.
- 293** NP/18/0533 Replace 2 no. existing rear storage sheds with flat roofed glazed sunroom with balcony over, introduce French doors and window to north and south elevations at Clegyr Isaf, St Davids, SA62 6QN.
